

THE STATE OF TEXAS

GOVERNOR

*To all to whom these presents shall come,
Greetings: Know ye that this official recognition is presented to all observing*

Neurodiagnostic Week

April 14–20, 2024

Individually and collectively, we depend on the health care profession, which today encompasses many advanced specialties, including neurodiagnostic technology. Scientific breakthroughs have given rise to innovative techniques and tools that can accurately identify neurological conditions, such as epilepsy, Parkinson's, and brain tumors. These diagnoses are exceptionally complex, and we ought to recognize the professionals who make them possible: neurodiagnostic technologists.

Neurodiagnostic technologists operate advanced machinery in order to bring about the best health outcomes possible, and consequently, their field requires extensive formal training and a rigorous certification process. These dedicated professionals have helped place many patients on the path to healing, and they therefore deserve the highest personal and professional esteem.

Furthermore, opportunity abounds in the field of neurodiagnostic technology. As neurodiagnostic equipment becomes more widespread, the demand for skilled technicians will grow. To promote this rewarding career path and to celebrate our neurodiagnostic technologists, groups in Texas and beyond observe Neurodiagnostic Week during the third full week in April. During this observance and hereafter, I urge all Texans to recognize neurodiagnostic technologists and the role they play in modern medicine. Together we can work to build a stronger, healthier tomorrow.

First Lady Cecilia Abbott joins me in encouraging all Texans to observe Neurodiagnostic Week with appropriate programs and activities.

In testimony whereof, I have signed my name and caused the Seal of the State of Texas to be affixed at the City of Austin this the 10th day of April, 2024.

Greg Abbott
Governor of Texas
